Dear Club President / Member.

We would like to introduce our company to your Motorcycle Club. We specialize in Stone chip protection kits for motorcycles that help to eliminate the danger of damage to the expensive paintwork of the bike caused by the high speed impact of stones, bugs, and other road debris, and will keep the bike looking pristine for many years to come.

These kits are computer designed and computer cut from clear virtually invisible urethane paint protection film and cover all areas that are not only prone to stone chips but also those high scuff areas of the motorcycle such as seat panels and fuel tank side panels.

The kits have been designed for ease of fit by any competent person and can therefore be supplied in a diy kit form to your members or alternatively they can be fitted for a nominal fee through our network of approved fitters.

We have kits for most on road motorcycles models dating from 1999 to 2010 that have comprehensive coverage especially for the front end of the bike and other high scuff areas.

We are offering all your validated club members a 20% discount on the normal retail price of the kits whether it be fitted or in kit form (please note the price of a diy kit will not include the price of postage and this will be an extra charge).

We have not included prices as we work out costs based on the amount of film the kit is cut from this way your members get the best possible price for their bike whether it be a tourer with panniers , a sport bike or a cruiser so all your members need to do is phone or email us with the model and year of their bike, diy or fitted and we will quote them a price.

The paint protection film we use comes with a lifetime warranty against bubbling, peeling, yellowing and cracking and is virtually invisible once fitted so does not detract from the overall finish of the paint.

Please visit our website for more information.
